

Internal Networking Suite

Cooperation is the basis for growth and success. This is true for all types of organisations and enterprises. Starting today, you can achieve more here!

Foster firm bonds between departments and minimise problems due to friction. Establish cross-departmental communication channels. Give targeted support to subsidiaries and national companies by connecting people that are passionate about co-operation.

Create a culture of lively exchange to generate hitherto unprecedented momentum – our Internal Networking Suite has all the tools you need to achieve this.

Useful Modules include:

Networking Module

- ▶ *Lunch Dates*
People will bond more during a casual and enjoyable hour over a shared meal than during many hours of project work. Consciously use this cultural insight and get those people around a table that really will bring your organisation forward.
- ▶ *Onboarding*
Use the Onboarding Module to really induct new members into your organisation. It will be worth it – the 'newbies' will settle in quickly, directly fulfil their potential and work in the best possible way in their areas.
- ▶ *Know How Transfer*
It is not the servers and archives that hold the know how to your organisation but the people. Don't wait until knowledge carriers leave your company – our Know How Transfer Module will ensure that these individuals will share their knowledge and skills in a timely and continuous manner to the right people and multipliers.
- ▶ *Culture Boost*
When people meet on a personal level and don't just see each other as job titles, they are more prepared to support each other and go the extra mile for that. The Culture Boost Module will encourage your employees to get to know each other better and you will reap the rewards of a generally improved working atmosphere.
- ▶ *Job Insight*
Which are the areas of development for an employee? How do the colleagues in our sister company in another country work? Job shadowing an experienced colleague will answer these questions much better than any theoretical exercise ever could. Organise meetings like that with our Job Insight Module and guarantee easily accessible and reliable insights.
- ▶ *Cross Department Links*
Team work between departments often comes down to organisation but is just as much a question of the right chemistry between the key players. Bring together the right individuals and create connections that will inspire all departments involved.
- ▶ *Stay In Contact Groups*
Former colleagues, participants of a workshop or alumni of a mentoring program often lose touch during the busy day-to-day work life. This module will help your colleagues to

maintain these valuable contacts in the long term thus driving the dialogue across organisational borders!

Management Module

▶ *Generate News*

The Generate New Module will allow you to target information so that it has the optimum effect. Even if you have abvery large participant base you can serve your pre-defined circles in the best possible way. Everyone is up to date and no one will be inundated with irrelevant information.

▶ *Manage Participants*

Manage participant list for events, courses and meetings. Search and filter according to criteria that are important to you and use our Manage Participants Module to create participant bases for other Modules. All in line with data protection laws. Our systems are extremely flexible and adaptable and we can implement your company agreement.

Social Network Module

▶ *Find & Connect*

The next level notice board: The Find & Connect Module will allow your employees to look for the support they need themselves, inside or outside their areas of competence. This matching service is compliant with data protection laws and can be checked and approved by your work council.

Event Module

▶ *Special Events*

Our Special Events Module offers more than organisational support for your internal events. It will help you to carry out your conferences, kick off meetings and parties without any glitches. It also adds value to these events by bringing together the right people on every level.

Our Experience

**BMW
GROUP**

GetConnected Espresso Tandems

Matching for professional exchanges within BMW Group's Development Department

“The BMW Group's electronics division has always been driven by 100% reliability when it comes the perfection and punctuality of project launches. Having a chat over a coffee is not

really on the agenda. It is obvious though, that network thinking and innovation go hand in hand. To win over a discerning community of this calibre, you have to show that an efficient and targeted knowledge transfer will take place. The pilot 'GetConnected / Espresso Tandems' in one leading department convinced participants to carry on and to widen the group of participants in order to find further suitable matching partners. I totally trust Chemistree and their professionalism and cooperative approach and look forward to working with them and launching new activities."

Claudia Trouvain

Business Innovation Key Account Manager, BMW Group, February 2018
